

## MISys® SBM - Advanced Purchasing

*Many people find that the basic capabilities provided by their accounting/bookkeeping software are sufficient to meet their purchasing needs. If you need purchasing that is fully integrated with the manufacturing inventory control and MRP functions of MISys Small Business Manufacturing, upgrade with the Advanced Purchasing module.*

The Advanced Purchasing module provides the following capabilities:

- Create, print, email and track formal purchase orders.
- Automatically detect quantity-based price breaks for each item and qualified supplier and provides opportunity to change order quantity for better pricing
- Calculate tax due for taxable items by supplier
- Instantly update raw materials inventory from purchase order receipts.
- Define and apply additional cost for accurate landed cost tracking.
- Expedite purchase orders to assist in production scheduling.
- Print internal purchase order approvals and multi-page purchase orders.
- Specify purchase order formats to fit virtually any pre-printed form or print on plain paper.
- Email purchased orders with user-defined body text and automatically attached PDF file of the order.
- Place blanket orders with scheduled delivery dates.
- Copy previous orders to speed up amending order generation.
- Receive items individually or by exception.
- Print optional purchase order receiver.
- Expedite or close orders at any time with any quantity received.
- Transfer invoicing data directly to Bills in Accounts Payable with Intuit QuickBooks, Sage Simply, Sage Accpac, Sage Peachtree or Microsoft Office Accounting.
- Display Gantt chart of purchase orders over time with ability to drag end date to trigger expediting the order.
